- Date of survey: 19-22/10/2020
- Survey method: Random telephone survey conducted by real interviewers
- Target population: Cantonese-speaking Hong Kong residents aged 18+
- Sample size: 1,020 (including 508 landline and 512 mobile samples)
- Effective response rate: 62.2%
- Sampling error: Less than 1.6% (at 95% confidence level, the maximum sampling error of all percentages should be no more than 3.1 percentage points)
- Weighting method: Rim-weighted according to figures provided by the Census and Statistics Department. The gender-age distribution of the Hong Kong population came from “Mid-year population for 2019”, while the educational attainment (highest level attended) distribution and economic activity status distribution came from “Women and Men in Hong Kong - Key Statistics (2019 Edition)”.

# Survey Result

3

- **Question: There is a recent suggestion that Hongkongers living in Mainland China should be allowed to vote in Hong Kong elections, but not for Hongkongers living elsewhere outside Hong Kong, like those living in Taiwan or overseas. How much do you support or oppose this suggestion?**
